

MSK Fellowship

Noosa Radiology offer 6 or 12 month Musculoskeletal Imaging Fellowships.

Applicants must have the RANZCR Fellowship or equivalent.

This position is structured to provide a mixture of fellowship training in MRI (3 days) and experience working as a general diagnostic radiologist in a private clinic setting (2 days).

The Fellowship encompasses all aspects of Musculoskeletal Imaging, with a particular emphasis on MRI, Ultrasound and Interventional MSK including Bursal injections, Arthrography, Intra-articular PRP, Orthokine Injections and Radio Frequency Ablation.

Noosa Radiology is a large multi modality independent practice with longstanding relationships in orthopaedic, sports medicine, spine surgery, and physiotherapy.

We further advance MSK imaging in Queensland through engagement in both teaching and research, in which the Fellow will be encouraged to contribute.

Enjoy the wonderful lifestyle benefits of living and working in the Noosa area including stunning beaches, numerous festivals and a variety of schooling options.

Lodge your Expression of Interest with our HR Manager, Gemma McCarthy on hr@noosaradiology.com.au.
